

VORTEX IRIS VALVE HANDLING PHARMACEUTICAL PELLETS

Customer: Company policy dictates name cannot be used

Product: Pharmaceutical Pellets

Application: Convey pills beneath tote system

Challenge: Develop an inlet to attach to the tote

Valve: Vortex Iris Valve

Results:

The 6" Vortex Iris Valve pictured above was specially made for a pharmaceutical company handling medication in pellet form.

The valve is constructed of 304 stainless steel. A ferrule-type fitting with internal welds ground and polished was fabricated for the inlet. The sleeve is made of FDA approved, urethane coated material.

Vortex manufacturers Iris Valves with many different options to accommodate specific customer needs.
